

ACROLINX: INTEGRATION POSSIBILITIES IS WHAT WE NEEDED

Company Information

- + Company: Acrolinx GmbH
- + Founded: 2002
- + Location: Berlin, Germany
- + Company Size: approx. 150 employees
- + Industry: AI content optimization technology for many different industries

WHAT PROBLEMS NEEDED TO BE SOLVED?

The company wanted a tool that offers full automation of security detection processes and simple integration into Slack.

- + Continuous testing throughout the development process and integration into CI/CD Pipelines
- + Each release must be tested and documented
- + Lower workload and time-saving for developers
- + Integration into Chat Tools like Slack and MS Teams

»I'm setting up some new workflows for Acrolinx in Slack and actively driving these. It's essential to protect the data that travels through this chat flow. Therefore, the Crashtest Security Suite is a top choice with its simple integration into a team collaboration tool.«

Georges El Haddad, Team Lead Engineering at Acrolinx

WHY CRASHTEST SECURITY

With Crashtest Security, Acrolinx found a tool that is the perfect fit for their requirements, not only on the technical side but also from a business perspective.

»We were looking for a tool to fill our needs, such as the full automation of security detection processes. Crashtest Security meets those expectations thanks to the easy integration into our CI/CD Pipeline.«

- Stefan Kamphausen, Senior Vice President of Engineering at Acrolinx

Throughout the proof of concept phase and implementation, Crashtest Security's responsible and attentive support has given Acrolinx the security they needed. Further, it was essential for Acrolinx to have a trusted partner that keeps up to date with current trends in Cyber-Security at eye level.

»Even though we don't have any „relevant“ findings yet, it's still important to check our web applications regularly and before each release to avoid security risks as much as possible. Automating the scans also saves our developers' time, as it requires little to no manual work.«

- Georges El Haddad, Team Lead Engineering at Acrolinx

THE BENEFITS FOR ACROLINX

SO HOW DOES ACROLINX BENEFIT FROM THE USAGE OF CRASHTEST SECURITY

- + Seamless integration into their chat tools
- + Complete automation of security detection processes
- + Detailed and meaningful vulnerability reports

»Crashtest Security is an important tool to keep our web applications as secure as possible. It's essential to test our web applications regularly and before each release to avoid major security vulnerabilities as much as possible.«

- Stefan Kamphausen, Senior Vice President of Engineering at Acrolinx

COMPANY DESCRIPTION

The combination of science, technology, and language is what Acrolinx makes possible with its software. The company started with leading language technology experts who have worked on complex content challenges for large organizations. The result was today's AI-powered software platform that helps organizations improve the quality and effectiveness of their content.
